

## NSFX

### NS7 EFFECTS CONTROLLER FOR SERATO ITCH

**UNLOCK FX AND EXPAND YOUR MIX.** NS7 DJs can now unlock Serato ITCH's effects capabilities with NSFX. Designed in collaboration with Serato for the ITCH system, NSFX is designed to mate perfectly with NS7, delivering seamless integration and hands-on control of the wide range of effects built into ITCH.

Because we designed NSFX in collaboration with Serato, it is seamlessly compatible with ITCH and class compliant, requiring nothing more than plugging the integrated USB cable in for activation. All controls are pre-mapped and no software-driver installation is needed so you can literally plug and play with NSFX.

Club DJs will appreciate NSFX's light-up controls that indicate each control's setting and/or status for visual feedback in virtually any lighting environment.

Unlock the effects in ITCH with the only effects controller designed for NS7 – NSFX.

Serato™ is a trademark of Serato Audio Research.
